

Stereo One – The best compact system of the year!

NORWAY: Lyd & Bilde, January 2006

SWEDEN: Bild & Ljud Hemma, January 2006

Verdict: 9 out of 10

“The few compact systems we have really liked, we can count on one hand. One of the best is made by the speaker specialist Audio Pro. Finally a compact system for music lovers”

“The last creation from swedish Audio Pro testifies fresh new thinking. In Stereo One the well known speaker manufacturer has used its competence by creating a compact system where sound quality stands in focus. And Stereo One can actually give you a taste of expensive hi-fi! Surprisingly many of the basic hi-fi qualities are in place. The sound image is large and deep with an exact placement of the musicians. The treble is without doubt the purest we have heard from any compact system before, and the midrange follow with an open and well-articulated voice reproduction. Still it is the bass that impresses the most. It is quick and full, but not upblown or swollen as in most compact mini systems. For those with limited space and budget, there are a lot of exciting products below 10.000 kr, but very few of them can court you with a music reproduction of the same caliber as Stereo One. A brilliant choice for the living room, kitchen or your summerhouse!”
